

Australian Council of Social Service

Our appeal to the Senate

We believe that a company tax cut is a mistake while almost 3 million people live in poverty.

It is unconscionable to pursue company tax cuts while refusing to raise the rate of Newstart and other allowances.

If the Senate allows these tax cuts to go through while the budget is still in deficit, further budget cuts are inevitable. We are concerned that already disadvantaged Australians may pay more for health, education and community services.
